

Do you have a passion for science communication?

Are you the next female equivalent to Brian Cox?

**Genepool Productions is looking for a physicist to host
a new international science documentary series.**

- We are looking for a female scientist (sorry guys!) who is an expert in her field.
- You do need to have a background in nuclear or particle
- You have your Doctorate or are currently a post-graduate student.
- You do not need to have any television experience.

If you're interested please email us at info@genepoolproductions.com by 7th October 2013.

Please include in your email the following information:

- A short bio with a current photo.
- Your science qualifications.
- Your age.
- The town or city where you are based.
- Email address and day-time contact number.
- Any television or presenting experience you may have.
- One paragraph on why you would like to be part of this project.

Due to the number of applications please be aware we cannot reply to all emails. If you are successful in reaching the next stage you will hear from us by mid October.

About Genepool Productions

Based in Melbourne Australia, Genepool Productions specialises in creating quality science documentaries for Australian and international television audiences. The company is led by Sonya Pemberton, 2012 Emmy award winner and three-time winner of the prestigious Eureka Award for Science Journalism (2003, 2004, 2008).
